SUMMARY

Informatics Engineering graduate from Universitas Sebelas Maret (UNS) with a cumlaude GPA and granted Programmer certification from BNSP (Badan Nasional Sertifikasi Profesi). Experienced across BUMN companies, government institutions, and technology programs. Selected trough competitive field with an acceptance rate 1.04% of over 5,000 applicants in Magang Generasi Bertalenta (MAGENTA) BUMN program as an Information Technology at the Risk Management Department of PT Petrokimia Gresik, responsible for developing and maintaining SIMAR (Sistem Manajemen Risiko). Previously worked as a Full-Stack Developer Intern at Dinas Komunikasi Informatika Statistik dan Persandian Kota Surakarta, contributing to the development SOLID platform digital letter management system for citizens of Surakarta. Selected as a Mobile Development cohort in Google Bangkit Academy, contributing to the development of Pandoe Application, a platform supporting Indonesian entrepreneurs. Passionate about leveraging technology to support digital transformation and delivering impactful solutions.

EDUCATION

Universitas Sebelas Maret 2021 - 2026

Bachelor of Informatics, Computer Science

GPA 3.62 , Kartu Indonesia Pintar Fully-Funded Scholarship by KEMENDIKBUDRISTEK.

PROFESIONAL EXPERIENCE

PT. PETROKIMIA GRESIK August 2025 - August 2026

Magang Generasi Bertalenta (MAGENTA) BUMN - Information Technology **GRESIK, INDONESIA**

- Developed and enhanced SIMAR (Risk Management System) features, including dashboard, Self-Assessment, Test of Design (ToD), Test of Effectiveness (ToE), and effectiveness reporting dashboard using ASP.NET, Microsoft SQL Server and JavaScript in collaboration with the digitalization IT team.
- Developed the Loss Event Database (LED) module within SIMAR to support risk event recording, monitoring, and reporting processes.
- Supported risk management reporting activities, including audit review processes and collaboration with Deloitte Indonesia.
- Designed visual learning materials, posters, and educational content for the Risk Management Learning Management System (LMS).
- Participated in the "Guardian of Risk" program and supported Governance, Risk, and Compliance (GRC) initiatives within the Risk Management Department.

Department of Communication, Informatics, Statistics, and Encryption January 2025 - March 2025

IT Government Sector - Full Stack - Web Developer **SURAKARTA, INDONESIA**

- Developed Solid Surakarta (Digital Letter Management System) for citizens of Surakarta using Laravel, Tailwind CSS, MySQL, and ViteJS also implementing RBAC (4Role) with scoping each sub-district and database integration.
- Designed and developed front-end and back-end components based on UI/UX prototypes created in Figma, applying structured coding practices throughout the development process.
- Enhanced the Digital Letter Management System (DMLS) by developing features that allow citizens to digitally upload, manage, and download administrative documents.
- Implemented private storage for restricted user documents.
- Implemented a comprehensive audit trail to track and record all status transitions.
- Resolved race conditions during simultaneous admin approvals by implementing strict state-transition validation and engineered a low-collision unique identifier generation system.
- Designed user manual for user and developer in order to simplify development in the future.

Bangkit Academy led by Google, Tokopedia, Gojek, & Traveloka 2024 February 2024 - August 2024
Private IT Multinational Company **Remote, Jakarta ID**

- Developed Pandoe, an AI-powered entrepreneurship platform that provides personalized business recommendations, expert mentorship access, and funding opportunity information for Indonesian entrepreneurs. Utilized Kotlin, Python, PostgreSQL, and API integration.
- Designed UI/UX prototypes in Figma based on user flow diagrams and implemented the Android application using Kotlin, XML layouts, Retrofit, and TensorFlow Lite for machine learning integration.
- Performed unit testing and debugging processes to identify, analyze, and resolve application issues, ensuring system functionality and reliability.

LEADERSHIP EXPERIENCE

Himpunan Mahasiswa Informatika Sep 2021 - Dec 2022
Universitas Sebelas Maret **Surakarta, Indonesia**

- Managed registration forms for students to submit their creative works and talent showcases.
- Curated and reviewed student submissions for content publication.
- Published finalized content on HIMASTER social media accounts to enhance organizational visibility and engagement.

Pekan Informasi dan Teknologi (P!NGFEST) Aug 2021 - Sep 2021
Universitas Sebelas Maret **Surakarta, Indonesia**

- Served as Sub-Coordinator of the Sponsorship Division for the National Seminar, the main event of P!NGFEST.
- Managed communication and negotiations with external organizations to secure event funding support and Built partnerships with organizations such as Solo Movie, Dicoding, Telkomsel, and PT PELINDO.
- Contributed to the successful execution of a technology and international education seminar attended by 250–500 participants.
- Documentations P!NGFEST

CERTIFICATIONS & PUBLICATIONS

Programmer 2026 - 2029
BNSP (Badan Nasional Sertifikasi Profesi)

- Clean Code, OOP, Algorithm,Structured Programming, Components Library, Debuging , Testing and Documentation.
- See Certificate

Prinsip Pemrograman Solid 2024 - 2027
Dicoding

- Clean Code, OOP, SOLID Principles, Software Design, Refactoring, Code Maintainability, Code Quality, Debugging, Best Practices, Documentation.
- See Certificate

Pemrograman Website 2024 - 2027
Dicoding

Web Development, HTML, CSS, Front-End, Responsive Design, UI Design, Web Layout, SEO, Website Maintenance, Web Deployment.

- See Certificate

Pemrograman Dengan Kotlin 2024 - 2027
Dicoding

- Kotlin, Android Development, OOP, Functional Programming, Basic Programming, Software Development.
- See Certificate

Fundamental Aplikasi Android
2024 - 2027

Dicoding

- Android Development, Kotlin, Java, UI Development, Networking, Web API, Database, Data Storage, App Architecture, App Deployment.
- See Certificate

Belajar Dasar AI
2024 - 2027

Dicoding

- Artificial Intelligence, Machine Learning, Deep Learning, Generative AI, Data Processing, AI Modeling, Data Analysis, AI Implementation, Intelligent Systems, AI Applications.
- See Certificate

Penerapan Machine Learning Android
2024 - 2027

Dicoding

Machine Learning, Android Development, On-Device ML, AI, ML Deployment, Model Integration, Data Processing, Mobile AI, AI Application Development.

- See Certificate

Pengembangan Aplikasi Android Intermediate
2024 - 2027

Dicoding

- Advanced Android, UI Development, Custom View, Animation, Localization, Accessibility, Background Service, Media Handling, Geolocation, Testing, Database, Firebase.
- See Certificate

Layer Wise IndoBERT Representation Evolution for Indonesian Misinformation Detection
Jan 2025 - Present

International Journal Scopus (Q1)

- Research collaboration with my lecture who studied in University Of Western Australia on progres submit on Scopus Journal (Q1).
- See Publications

Pengembangan Prototype Multi Copter Berbasis Computer Vision sebagai Inovasi Deteksi Lokasi dan Penyebaran Peralatan Medis dalam Kondisi Pandemi

PROJECTS

Sistem Manajemen Risiko (SIMAR)
simarpg.petrokimia-gresik.com/landing_page?ReturnUrl=%2F
2025

Software Engineer

- Simar v2 (Risk Management System) is an upgraded version of Simar v1, based on a web platform. This system is used to monitor and evaluate all potential risks that may occur within each work unit/compartement/department and among employees at PT. Petrokimia Gresik.

SOLID (Surakarta Online Letter Information Digitalization)
github.com/JulianD3wanto/minesight-command-center
solid-surakarta.my.id
2025

Full-Stack Developer

- SOLID is Digital Letter Management System for citizens of Surakarta has features request, review and approval - 25 services (SKTM, surat nikah, pengantar SKCK, domisili, keterangan usaha, pindah domisili, etc) and connected with admin for each sub-district.

CekHoaksIdn github.com/JulianD3wanto/cekhoaksidn cekhoaksidn.my.id 2025

AI Model & Full-Stack Developer

- Project research collaboration with my lecturer who studying at University Western Australia.Platform for combating misinformation in Indonesia utilize (Natural Language Processing) NLP which is IndoBERT Model.

Pandoe Application github.com/C241-PS488/pandoe-mobile github.com/C241-PS488/pandoe-mobile/releases/download/v1.0.0/pandoe-v1.0.0.apk 2026

Mobile Developer

- Pandoe is a mobile-based application integrated with machine learning designed to help Indonesian entrepreneurs to start, manage, and grow a business.

UNS Wallet github.com/JulianD3wanto/uns-wallet drive.google.com/file/d/1zD-jms2VX_q_HOF50Q7st_urVdIG2qGr/view?usp=sharing 2024

Mobile Developer

- UNS WALLET is a mobile digital wallet application intended for Universitas Sebelas Maret students and stakeholders.

SeminarGo github.com/JulianD3wanto/seminar-laravel seminargo.my.id 2026

Full-Stack Developer

- SeminarGO is an educational event platform for seminars and webinars. It allows users to browse, explore, and register for various events both paid and free covering topics like technology, business, and personal development.

Management Inventory System github.com/JulianD3wanto/inventory-app inventoryapp-phi-pink.vercel.app 2026

Full-Stack Developer

- The project is a web-based inventory management system designed to help with product recording, stock monitoring, tracking stock changes, and generating reports. The system also features an AI assistant.

CCNA Network Entreprise Simulation github.com/JulianD3wanto/CCNA-Portofolio-Website ccna-network-portfolio.vercel.app 2026

Telecommunications Engginer

- Developed a Network Engineer Technical Showcase featuring a mini Network Operations Center dashboard and interactive documentation for an enterprise Cisco Packet Tracer topology. Built with React, TypeScript, Vite, Node.js, and Express, the platform visualizes devices, VLANs, routing, ACLs, EtherChannel, STP, and IPv4/IPv6 configurations. It also includes deterministic network simulation for reachability testing, ACL decision analysis, packet-flow visualization, and device/link failure scenarios.

MineSight — Smart Mining Command Center github.com/JulianD3wanto/minesight-command-center minesight.my.id 2026

Full-Stack Developer

- MineSight is a real-time mining operations command center that monitors production, equipment, safety, and environmental conditions across open-pit mining sites.

SKILLS & AWARDS

Technical Skills:	Git, CI/CD, REST API, Network, Cisco, Python, Node.js, TypeScript, JavaScript, SQL, PostgreSQL, Flutter, Kotlin, AWS, .ASP.NET, Docker, Kubernetes, API Design, Flask, Git, DBMS, Artificial Intelligence.
Languages:	Indonesia (Advance), English (Intermediate).
Certifications:	Programmer, Pengembangan Aplikasi Android Intermediate, Pemrograman Dengan Kotlin, Prinsip, Pemrograman Solid, Belajar Dasar AI, Fundamental Aplikasi Android, Penerapan Machine, Learning Android, Membuat Aplikasi Android Pemula, Pemrograman Website.
Awards:	Selected for the interview stage from 3,000 students out of 9,000 applicants Indonesian, International Student Mobility Award (IISMA) KEMENDIKBUDRISTEK. Granted KIP (Kartu, Indonesia Pintar) fully-funded Scholarship for higher education by the Ministry of Education, and Culture.
